5 May 1959

TO: D/I, [REDACTED] 25X1A9a

It is proposed that a US-USSR exchange be considered in the field of governmental statistics. The exchange would investigate the collections, processing and analysis of data used by the US and the USSR for the construction of various aggregate measures of production, price changes, inventory, income, etc. An exchange extending a minimum of four weeks would be desirable. Moscow and Washington would be the focal point for the exchange delegations although visits to regional offices would also be desired.
